Bank Street College

Jon D. Snyder, Dean of the College

Bank Street College is a small, vibrant institution organized into two main programmatic divisions: the Graduate School of Education and Children's Programs. The institution shares a common sense of purpose:

Mission Statement

The mission of Bank Street College is to improve the education of children

and their teachers by applying to the educational process all available knowledge about learning and growth and by connecting teaching and learning meaningfully to the outside world. In so doing, we seek to strengthen not only individuals, but the community as well, including family, school, and the larger society in which adults and children, in all their diversity, interact and learn. We see in education the opportunity to build a better society.

The Bank Street Approach

Bank Street's creative approach to teaching and learning recognizes that children learn best when they are actively engaged with materials, ideas, and people. Using this approach, Bank Street teachers encourage children to be curious, love learning, be respectful and tolerant of human differences, engage with the world around them, and prepare to lead lives of consequence.

Referred to as either the "Bank Street approach" or the "developmental-interaction approach," our educational philosophy begins with sound developmental principles and learning through experience. It sees the teacher as one who facilitates learning, develops clear educational objectives, and encourages learning through discovery and thoughtful engagement.

We strive to foster children's development in the broadest sense by providing diverse opportunities for physical, social, emotional, and cognitive growth. We respect children as active learners, experimenters, explorers, and artists. We

understand that children do not all learn at the same rate or in the same way. We also understand that learning is social, and that children learn in interaction with their environment. Finally, we believe that the Bank Street approach leads to a lifetime of learning.

Through its innovative programs, unique philosophy, and commitment to quality education for all, Bank Street continues to influence thousands of children, youth, parents, and educators throughout the United States and abroad.

Bank Street Divisional Connections

Children's Programs includes the School for Children—a highly respected, innovative independent school for children aged three to fourteen—and the Family Center for infants and toddlers. Many graduate students work alongside the School's and the Center's excellent faculty as student teachers and assistant teachers. Several of the School for Children faculty teach courses in the Graduate School. This interaction between divisions allows students to participate in the educational process that they learn about in their courses.

The Graduate School also provides outreach and professional development to schools, districts, and other agencies. These professional development efforts link the College to communities on both local and national levels through direct service programs, staff development, courses for professionals, technical assistance to other agencies and national groups launching pilot projects, research, and advocacy. The office of Continuing Professional Studies offers the College's continuing education courses. These graduate-level short-format courses are available either with or without credit for teachers, administrators, and others who work with children and youth.

Bank Street College has a historical and philosophical commitment to encourage diversity in our student body, staff, and programs. As a matter of policy and as required by law, we do not discriminate in admissions decisions or in any educational program or activities on the basis of color, creed, ethnicity, disability, gender, age, marital status, or sexual preference.

The Graduate School

Virginia Roach, Dean of the Graduate School

For nearly a century, Bank Street College of Education has been a leader in learner-centered education. The Graduate School provides outstanding master's degree programs that blend theory with practice through close integration of academic study and field-based experiences. These programs prepare adults for professional work in schools, museums, hospitals, community organizations, and/or public service.

The Graduate School is grounded in a learner-centered approach that is also exemplified in our Children's Programs. Our master's degree programs closely coordinate academic work with field-based practice, preparing students for various roles as educators and leaders in schools. In addition, Bank Street prepares educators for centers of learning that include museums, child life centers in hospitals, and other community organizations.

Some graduate students come to Bank Street having just finished undergraduate study, some have worked as teachers for several years, some are moving from teaching to leadership, and some are making a career change into the teaching profession. In 2011–2012, more than 1,000 graduate students enrolled; one-quarter of the students were African American, Hispanic, Asian, or Native American. The faculty of the Graduate School are scholars and practitioners, researchers, and teachers. Their work with Bank Street graduate students is their first concern.

Graduate Study at Bank Street

Graduate students enroll each term at Bank Street either as matriculated students, which means that they have applied to and been accepted into a degree-granting program, or as nonmatriculated students, taking courses in the Graduate School of Education but not enrolled in a degree program. Individuals with bachelor's degrees are welcome to come and take courses as nonmatriculated students.

Degree programs lead to the Master of Science (M.S.), Master of Science in Education (M.S.Ed.), or the advanced Master of Education (Ed.M.).

All programs are registered with the New York State Department of Education, and most lead to New York State certification. Please refer to the section on New York State certification (page 123) and to the detailed program descriptions for additional certification information and prerequisites. At times minor revisions in programs may be pending New York State Department of Education approval. These are denoted in the program descriptions.

Accreditations and Affiliations

The Graduate School of Education is accredited by the Regents Accreditation of Teacher Education (RATE) and by the Middle States Association of Colleges and Schools and holds memberships in the Association of Independent Colleges and Universities of the State of New York, the Council of Higher Educational Institutions in New York City, the American Association of Colleges for Teacher Education, and the American Council on Education. The College is chartered by the Board of Regents of the State of New York. The Graduate School has been accepted as a formal candidate for NCATE accreditation.

“As a career changer with two children, I was nervous about going back to school, but Bank Street has been really inspiring. Teachers here share theory and practices, but also model amazing teaching. The community is supportive, thoughtful and enthusiastic. I have no doubts about my new career anymore!”

Bank Street Online

BankStreetOnline is an institutional unit dedicated to the advancement of online teaching and learning at the college. Its mission is to support the Bank Street community's efforts to promote innovative teaching strategies and technologies to enrich the learning of our graduate students and their students, which will in turn provide the institution with long-term opportunities to extend its reach.

BankStreetOnline is dedicated to offering online courses that reflect Bank Street's understanding of teaching and learning. What does it mean to teach in an online environment using a Bank Street approach? It means courses that include:

- * A sense of community and social presence
- * Opportunities for authentic collaborative inquiry
- * Constructivist experiences and discovery rather than simple information delivery

It is important that Bank Street graduate students engaged

in an online learning environment recognize and experience themselves as part of a community of learners as they explore the course content online.

Information for courses that are either fully online or blended (courses featuring both online and face-to-face sessions) can be found in the schedule of classes. Students who would like to find out more about online courses that are right for them should make an appointment to speak with their program director or advisor.

It is recommended that students participate in the Online Student Orientation. It introduces students to the online environment and provides effective strategies for successful learning online. Students may join the orientation by going to <http://www.epsilen.com/Inst/Bankstreet>. For technical support, students should refer to the Student Handbook or contact the Bank Street Help Desk at (212) 875-4642 or helpdesk@bankstreet.edu. Students enrolled in online courses are expected to meet the same high professional and academic standards and adhere to the same high standards for academic integrity as for face-to-face courses. (See page 117.)

“Students should be prepared for an education experience that will last a lifetime. The educators at Bank Street are highly knowledgeable about their craft, are full of resources, and simply want to share with you what they know. Bank Street prepares you to educate students of all backgrounds and cultures in various classroom settings. They are deeply dedicated to seeing children and you, the educator, succeed in the future.”
