

“What stood out to me about my program was the fact that students are able to tailor their course of study according to their particular interests. I also appreciated that faculty were attentive and supportive of my professional and academic goals. Not only did I make life-long friends during my time at Bank Street, the school also made me a more conscientious and dedicated teacher of young children.”

**Rita, Early Childhood Special Education**

# Academic Programs

# Academic Programs

All graduate degree programs include three components: course work; supervised fieldwork/ advisement; and a culminating integrative project. There are four academic terms: Fall, Spring, Summer 1, and Summer 2.

## Course Work

Courses provide students with the opportunity to engage in readings, discussions, and experiences that address enduring and current aspects of education. The course work in all degree programs emphasizes human development and its variations; the historical, philosophical, and social foundations of education; and curriculum and inquiry. Through a variety of intellectual and experiential means, students acquire understanding of the role of education in promoting appreciation of human diversity. Course instructors challenge students through assignments, problem-solving tasks, and models of active learning.

Graduate courses are generally held during weekday evenings (Monday through Thursday) once a week. In the Summer 1 term, courses are generally held twice a week in the evening. In the Summer 2 term, courses are offered during the day as well as twice a week in the evening. Courses designed for the Museum Education, Museum Leadership, and summer-residency master's programs follow a different timetable. The course schedule, which is available online, provides the schedule details for each term.

## Supervised Fieldwork/Advisement

One component of a Bank Street education, unique to this College, is supervised fieldwork/advisement (SFWA), a multifaceted process that enables students to integrate the study of theory with practice. This includes work as a student teacher, an assistant teacher, a head teacher, an educational leader, a museum intern, or a child life intern.

During the period of supervised fieldwork/advisement, in most programs, the advisor visits the student in fieldwork settings for half-days at least once a month. If the student is a student teacher or assistant teacher, advisors also work closely with the cooperating classroom teacher. The advisor and student also meet twice monthly for in-depth consultations.

In addition to meeting with each student individually, the advisor meets with his or her small group of advisees as a whole weekly. This "conference group" provides a setting in which students collaborate with fellow learners as they explore the challenging issues that face them as educators in their field placements. Throughout this crucial time of supervision, an advisor supports and encourages each student to develop his or her professional capacity. Through individual and group meetings, students learn more about their practice while being supported by others, and they gain perspective and

reflective insight into their own practice as teachers or leaders. They learn to apply material from course work to their practice and to reflect on this process. Students are expected to participate as responsible professionals in all facets of supervised fieldwork/advisement.

Some programs, including most Educational Leadership programs and some Special Education programs, have a different structure for supervised fieldwork/advisement. See individual program listings for the description of their respective supervised fieldwork/advisement structures.

## Supervised Fieldwork/Advisement Options for Students in General, Special, and/or Dual Language/Bilingual Programs

Graduate students in general education, special and general education, or dual language/bilingual education programs may choose to do supervised fieldwork/advisement as student teachers, assistant teachers, or head teachers. In addition to the supervised fieldwork/advisement semester(s), many programs leading to state certification require additional supervised experiences during the summer terms or during the school year. See individual program descriptions for details. An explanation of the differences among the fieldwork options follows.

### Student Teachers

Student teachers are typically placed in two to four different public and independent school sites over the course of the supervised fieldwork/advisement year. Students, advisors, and the program director discuss placements, and decisions are made based on the availability of placements, with consideration for the student's professional needs and interests. Typically, the student-teaching schedule requires three full days per week (unpaid); however, in some rare cases other scheduling arrangements equivalent to three full days are made.

### Assistant Teachers

Assistant teachers are typically employed by a school five days a week. This site must be approved by the Bank Street program director as a supervised fieldwork setting appropriate to the student's program. Since the assistant teacher's own classroom is the training site during supervised fieldwork, and the faculty advisor will be making regular visits, the school principal/director must approve of the assistant teacher's participation in the program. The principal/director also needs to be aware that the assistant teacher's instructional approaches and curriculum in the class may change as the result of the advisement process. The supervised fieldwork/advisement process entails collaboration among the graduate faculty advisor, assistant teacher, and head teacher. Arrangements are made within individual programs for assistant teachers to expand their supervised experiences to include other age groups and diverse student populations and school environments. Students are responsible for obtaining an assistant teaching position on their own.

## New Academic Programs Under Development

### Teaching English to Speakers of Other Languages (TESOL)

Cristian Solorza, Director: 212-875-4553,  
csolorza@bankstreet.edu

#### Master of Science in Education (M.S. Ed.)

This program, which is in development, is designed for those applicants seeking preparation to teach English as a new language to speakers of other languages (Pre-K to 12). This program prepares students to create developmentally appropriate learning environments for those who are learning English by creating instructional activities, monitoring and assessing student progress, and collaborating effectively with families and co-workers.

Graduates of this program will be eligible for New York State certification in Teaching English to Speakers of Other Languages. The College anticipates offering the program beginning Fall 2016. Those interested in this program should refer to the College website for updates.

### Teaching Students with Disabilities 7-12 Generalist

Mimi Rosenberg, Director: 212-875-4544,  
mrosenberg@bankstreet.edu

#### Master of Science in Education (M.S.Ed.)

This program, which is in development, is designed for applicants seeking to teach adolescents with disabilities in grades 7-12. This program prepares candidates to adapt instruction and make accommodations for students with special needs who are in inclusive settings. Candidates will develop skill in working collaboratively across teams to support adolescents with a range of social/emotional and academic needs and abilities.

Graduates of this program will be eligible for New York State certification in Teaching Students with Disabilities. The College anticipates offering the program beginning Fall 2016. Those interested in this program should refer to the College website for updates.

### Head Teachers

Individuals who are head teachers in public or independent schools may be supervised in their own classrooms upon the Graduate School's approval of the school site or center. Since the teacher's own classroom is the training site during supervised fieldwork, and the faculty advisor will be making regular visits, the school principal/director must approve of the teacher's participation in the program. The principal/director also needs to be aware that the teacher's instructional approaches and curriculum in the class may change as the result of the advisement process. The faculty advisor and the program director communicate with the school administration as appropriate. Where necessary, head teachers in General or Special Education programs expand their supervised experiences to include other age groups and diverse student populations and school environments.

### Integrative Master's Project

Bank Street degree programs require students to complete an Integrative Master's Project (IMP). As the culminating component of the degree, the IMP is expected to be a significant, academically rigorous body of work that integrates many facets of the student's experiences in the field and at Bank Street. This work will showcase how students apply theoretical knowledge to their current and future work as educators and educational leaders. Students are encouraged to discuss their IMP choices with their advisors early in their

studies at Bank Street. A full description of each IMP option can be accessed at [www.bankstreet.edu/graduate-school/academics/integrative-masters-project/](http://www.bankstreet.edu/graduate-school/academics/integrative-masters-project/). Students in all the General Teacher Education programs and Special and Dual Language/Bilingual Teacher Education programs, the Child Life program, the Studies in Education program, and some Educational Leadership programs choose one of the options described briefly below.

**Independent Study:** This is a student-initiated project or formal study guided by a faculty mentor. The schedule for this option varies, but students generally work on it over two semesters. A Commence Form signed by a student's advisor or program director and faculty mentor is required for registration, which can occur during the registration period for any term. Students present their independent studies to faculty, peers, and families.

**Portfolio:** Students write reflective essays on artifacts (documents, student papers, videos, objects, etc.) from their professional and academic experiences, organize and present those artifacts thematically, and frame them with introductory and concluding essays. Individual mentoring and monthly small peer-group meetings take place at Bank Street throughout the year. Students present their portfolios to faculty, peers, and families the evening before graduation. (The application for this option is due by the preceding June 30th.)

**Mentored Directed Essay:** Students who register for this option will be assigned a mentor by program faculty and will meet with their mentor in person and via phone/email four times during the semester. The completed essay will be read by the mentor. Directed Essay questions for each program are posted online. This IMP option is available Fall, Spring, and combined Summer 1 and 2 semesters. Students register online or in person during the registration period for each semester.

**Site-Based Inquiry and Collaborative Student-Faculty Inquiry:** In both options, a faculty mentor will work with a group of 4–6 students, meeting four times during a semester to define and carry out a small-scale site-based research study. Students electing to do a Site-Based Inquiry will define the focus of their individual inquiry. For the Collaborative Student-Faculty Inquiry, the faculty mentor chooses the group topic within which students identify a specific area of focus. Students present their projects in January (Fall semester) or

before graduation (Spring semester). Faculty mentors and meeting schedules for the two inquiry options as well as specific topics for the Collaborative Student-Faculty Inquiry will be posted before registration begins each semester. Available Fall and Spring semesters only.

For students in selected Educational Leadership programs, the Leadership Professional Seminar or a program-specific portfolio is the culminating activity. Because of culminating work at Hunter, students in the Infancy Dual Degree program with Hunter College School of Social Work are exempt from the Integrative Master's Project requirement.

### **Credit Hour Assignment Policy**

Bank Street Graduate School of Education credit hour calculations for degree and certificate programs follow NYSED guidelines, which are based on the U.S. Department of Education's definition of credit hour. Please view the Credit Hour Assignment Policy on the course schedule webpage for more information.
