the two
things that
amaze me most about
bell curves are the things
we say are in them, like reading
scores and heights and wealths and visions,
and each thing we say is not, like karma and charisma,
free will, testosterone, and greed, resistance to disease and beauty,
sense of humor, sense of duty, pity, hatred, indecision, wealth of vision, common sense.

Steve Kohn

Steve Kohn entered the New York City system of public education in 1947. He has not yet left that system. He began teaching adolescents in 1963 and continues to enjoy improving in that art.
